Summary

Full-Stack MERN Developer experienced in building secure, scalable web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in RESTful API development, JWT authentication, role-based access control, and responsive UI development. Currently contributing to a production-grade LMS, with 25+ APIs and end-to-end full-stack features delivered during my internship. Seeking a full-time software development role to apply strong full-stack and API development skills.

Experience

MERN Stack Developer Intern, Trackpi – Ernakulam July 2026 – present

- Developed a full-stack Learning Management System (LMS) using React.js, Node.js, Express.js, and MongoDB, building 25+ RESTful APIs and Mongoose data models for user management, course enrollment, assessments, progress tracking, and certificate management.
- Implemented JWT-based authentication and 3-tier role-based access control (RBAC) for User, Admin, and Super Admin roles, along with key learning features including video progress tracking, section-based assessments, course completion logic, and automated certificate generation.
- Collaborated with a cross-functional development team to integrate frontend and backend systems, tested and debugged APIs using Postman, and managed Git/GitHub workflows including branching, merging, and code reviews.

Projects

Learning Management System (LMS)

- Developed a full-stack Learning Management System using React.js, Node.js, Express.js, and MongoDB, delivering 25+ RESTful APIs for user management, course enrollment, assessments, progress tracking, and certificate management.
- Implemented JWT-based authentication and role-based access control for User, Admin, and Super Admin roles, ensuring secure API authorization and access management.
- Built core learning features including video progress tracking with resume functionality, section-based assessments, automatic scoring, course completion, and certificate generation.
- Designed and maintained Mongoose data models and integrated REST APIs with the React frontend while collaborating through Git/GitHub for branching, merging, debugging, and code integration.

Blog-Media — Full Stack Application

github.com/alfred680/blog

- Engineered a full-stack MERN application with a decoupled React (Vite) frontend and Node.js/Express.js backend, integrating RESTful APIs and MongoDB for scalable data management.
- Implemented secure JWT authentication and role-based authorization, with Stripe-based payment verification to manage premium user access and protected content.
- Developed core platform functionality including blog CRUD operations, commenting, content reporting, and real-time chat using Socket.io, supported by a modular backend architecture with routes, controllers, and middleware.
- Deployed the application on Vercel, configuring the frontend, backend APIs, and MongoDB integration for a production-ready cloud environment.

Education

B.Voc Software Development

Sept 2022 – May 2025

St. Albert's College, Kochi, Ernakulam

Skills

Languages: JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, Bootstrap, Tailwind CSS , Socket.io, Mongoose

Databases & Tools: MongoDB, Git, GitHub, RESTful APIs, JWT Authentication, Postman, Vite
